EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech in Computer Science and Engineering (specialization in AI & ML); GPA: 8.42

Bhopal, India

Sept. 2023 – Present

Shri Ram Global School, Whitefield

CBSE (Class XII); Percentage: 83%

Bangalore, India

June 2021 – May 2023

Vagdevi Vilas School, Varthur

CBSE (Class X); Percentage: 93.6%

Bangalore, India

June 2020 – May 2021

TECHNICAL SKILLS

Languages: Python, Java(Beginner), SQL

Frameworks: TensorFlow, Keras, PyTorch, Django, Flask

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Streamlit, LangChain, LangGraph, CrewAI

Developer AI Tools: Git, GitHub, Docker, VS Code, AWS Cloud, Google Cloud

Technologies: Machine Learning, Prompt Engineering, Cloud Computing, LLMs, AI Agents, DevOps

PROJECTS

Agentic News Briefing System | [Link](#) | APIs, Node.js, Baileys, GitHub Actions

May 2026 – June 2026

- Developed an automated AI news briefing system that aggregates updates from NewsAPI and RSS feeds, generating concise daily summaries using Google Gemini and delivering them directly to WhatsApp.
- Built a scheduled CI/CD workflow using GitHub Actions to automate news collection, AI summarization, artifact generation, and WhatsApp message delivery.
- Integrated the Baileys WhatsApp Web API with secure GitHub Secrets management for reliable authentication and end-to-end workflow automation.

Pothole Detection System | [Link](#) | Python, YOLOv8, OpenCV, Gradio

April 2026 – May 2026

- Developed a deep learning-based pothole detection system using the **YOLOv8** object detection framework for automated road condition assessment.
- Implemented transfer learning with a pretrained CNN backbone to improve detection accuracy and enable efficient training on limited datasets.
- Built an interactive **Gradio** web interface for real-time image inference, visualizing pothole locations with confidence scores and bounding boxes.

DevOps Deployment System | [Link](#) | Docker, Kubernetes, Helm

Nov 2025 – Dec 2025

- Designed a red-blue containerized web application using Helm charts to manage versioned Kubernetes deployments and simplify version switching.
- Built Docker images manually and deployed applications on a local Kubernetes cluster, simulating production-grade DevOps workflows.
- Configured Kubernetes services to expose and manage multiple application versions, demonstrating deployment stability and traffic routing concepts.

CERTIFICATIONS

AI Fluency | [Link](#) | Anthropic

July 2026

Introduction to IoT | [Link](#) | NPTEL

May 2026

Cloud Computing | [Link](#) | NPTEL

April 2025

Kaggle GenAI Intensive Badge | [Link](#) | Google

April 2025

ACHIEVEMENTS

- Solved **750+** problems across **CodeChef** and other coding platforms.
- Actively participated in multiple **hackathons**, strengthening problem-solving and team collaboration skills.
- Participated in AI and Machine Learning competitions, including the **Google Kaggle GenAI Intensive** program.
- Built and showcased multiple end-to-end projects in **Machine Learning**, **LLMs**, and **DevOps**.
